

## KIALOA Dragon Hybrid

Almost a decade ago KIALOA came out with the first carbon wood hybrid canoe paddle for the outrigger market. We're now bringing that technology to the world of dragon boating. The genius of this blend of wood and carbon lies in the inherent natural flex in the wood shaft with the strength and lightness of the carbon blade. KIALOA's success with the hybrid outrigger paddle created a stir with dragon boat racers and the demand for a hybrid dragon boat paddle was created. The KIALOA Dragon Hybrid has a triple laminated wood shaft and hand shaped Ergo-T™ with a full carbon blade. The KIALOA Dragon Paddle is also IDBF approved, weighing an average of 19 oz and available in sizes 42-51".

## Dragon Paddle Bag

We took our experience with paddle bag design and applied it to the dragon boat paddles. Made of durable high denier nylon, fully padded and lined with pack cloth, an adjustable strap, a front mesh pocket for wet things and a side zipper for easy access. Holds up to 2 dragon boat paddles with protective dividers and comes with a signature KIALOA splash.
